SUPPLEMENTARY INFORMATION:

Background

The final regulation that is the subject of this correction was intended to provide policy changes that meet the needs of the insured, are easier to administer, and delete repetitive provisions contained in various Crop Provisions.

Need For Correction

As published, the regulations for cotton and extra long staple (ELS) cotton, in the final rule for the "Common Crop Insurance Regulations; and Various Crop Insurance Provisions," contained errors which

may prove misleading and need to be clarified. The introductory headings in the cotton crop insurance provisions and ELS cotton crop insurance provisions state that the provisions are for the 1998 crop year; however, the intended effect of the regulations was for the 1998 and succeeding crop years. These provisions were intended to reflect that the Federal Crop Insurance Corporation (FCIC) would solicit comments for establishing the 1999 and subsequent crop years prevented planting coverage level percentage. A proposed rule has been drafted by FCIC for publication in the **Federal Register** that includes solicitation of comments on the prevented planting coverage level for cotton and ELS cotton.
